"Usually by the second treatment, we begin to notice results... Dr. Weiss reported: "Within one month after the last treatment, the most significant improvement typically occurs. Based on our knowledge of similar technologies, we believe that the results will last for many years." The application is safe and allows for the skin temperature to be maintained between 40° and 42°. The system's delivery of energy is precise and uniform, and the energy is delivered to the skin surface, without any heat." Dr. Weiss reported: "They're not afraid of needles - similar to a very warm massage!"
